

Events And Workshops Team

The Events Team will help to *plan* events for our community garden. They will have contact with the Communication Team, to find the needed volunteers from within the community group, as well as outside volunteers to assist with the event. They will participate in these events, and help organize them and make sure that the appropriate people are called in to do the actual event. As well, they will make sure that we have the appropriate equipment, tables etc., food and beverages for the workers things like that.

They will make sure that the planning of an event or workshop starts at least three weeks in advance of the date for it to be approved. The event needs to be advertised to the gardeners and the public, at least two weeks in advance of it. When appropriate, the Fund-raising Team will be called in to assist.

Seedy Saturday is a very important event for our community garden. It is an opportunity for our garden to trade our seeds to get new seeds for the new season, as well, the venues often have very good workshops and demonstrations. So, the Events Team, would work on setting up our table and making sure that our saved seeds are packaged nicely.
