

## Fund-Raising Team

The Fund-Raising Team will work with the Events Team and on their own, to look for opportunities for the community garden to raise some funds, or where we qualify for certain grants.

The Fund-raising Team will co-operate with the events team for our community garden. They will have contact with the Communication Team, to find the needed volunteers from within the community group, as well as outside volunteers to assist with any fund-raising project, like starting seedling for a spring plant sale. They will participate in these events, to monitor how well they work out as a source of funds. As well, they will make sure that the events team have the appropriate equipment, tables etc. Needed for any fund-raising venture.

They will make sure that the planning of a fund raising project starts at least three weeks in advance of the date for it to be approved.

Seedy Saturday is a very important event for our community garden. It is an opportunity for our garden to trade our seeds to get new seeds for the new season, as well, the venues often have very good workshops and demonstrations. Where as the Events Team, would work on setting up our table and making sure that our saved seeds are packaged nicely - The Fund-raising team, would take care of the seed packing and gift ideas that we would like to offer.
