

Watering Team

The Watering Team will be responsible for watering all the common area garden beds. They will coordinate with the Grass Cutting Team to make sure that they are not watering and making the grass wet, when the Grass Team is about to come in and work.

From time to time, if the watering team needs assistance, the garden coordinator will assign a volunteer to help with the watering. In that case the Team Captain will make sure that the volunteer know the different techniques for watering.

The watering Team Captain will make a final decision about the frequency of watering times, by taking the current weather patterns into consideration.

The watering team will also be in charge of the watering hoses, making sure that they are hung properly and not left twisted up.

All gardeners are expected to return the hoses to the hose hangers

Things that need to be watered:

- Front Flower Bed – twice a week
- Raspberry Patch – twice a week
- The Herb Garden – three times a week
- Butterfly Garden – consult with Kevin
- The Demonstration Garden Plot #19 – consult with Susan
- Extra items might include those gardens that are on vacation or ill.
